SANGO
integrated POS terminal

Irresistible EPOS!

*With no intrusive base, stand or foot, **SANGO** soars effortlessly, as if weightless, offering and revealing a space traditionally occupied by the central unit and motherboard.*

Elegantly attached and suspended from its offset cast aluminium arm, the POS combines minimalist aesthetics and ease-of-use (a dedicated till drawer can be housed under the screen) - as well as lower power consumption.

Stable and rigid, its thin metal base (a natural extension of the slender and beautifully-designed arm) acts as a heat sink.

Equipped with an SSD (solid state drive), sango will adapt to the technology requirements of all users; 3 types of processors are available (including a fan-less i5 for boosted performance), as well as a range of connection options. The flat LED touch monitor, with an edgeless surface, is offered in multi-touch projected capacitive (PCAP) technology; (resistive panel is optional).

Its glossy polycarbonate finish, featuring a range of seven modular colours (White, Black, Red, Blue, Orange, Grey and Cassis) provide the final touch for the brand image and visual identity of all points of sale and service.

Several additional accessories and peripherals are available: graphic customer display, dual-screen system for digital display applications (2nd screen - integrated or standalone), integrated 1D or 2D bare-code scanners, card readers, associated cash-drawer and receipt-printer, etc.

SANGO

Free space under the screen

Ergonomic touch screen - thin, flat, projected capacitive multi-touch panel (PCAP)

High quality materials and detailed finishes

3 different types of processors available (among which a fanless i5 version)

Fanless EPOS terminal (no ventilation)

Multiple connection options

Flash Disk SSD

Associated peripherals available (options)
