

## RETAIL IT SHOPIFY INTEGRATION

### CEGID RETAIL & SHOPIFY

Harness powerful data and real-time insights to drive business decisions with enhanced visibility into inventory, sales and customer data!

- **Product Management** - eliminate double data entry and easily push products, attributes, images, price lists and stock availability
- **Inventory Management** - prevents overselling of products online, especially when using a shared pool of merchandise
- **Ecommerce Orders** - despatch from a central warehouse, store or click & collect with status updates
- **Customer Management** - records are synced automatically and verified via email
- **Price Management** - ability to manage prices without uploading the full extended production information
- **Cancellations, Returns, Refunds & Order Fulfilment and more**

UNIFY YOUR COMMERCE STRATEGY!

## OUR SPECIALITY

### CONSULTANCY

We are experts in retail technology and know what solutions retailers require to be more productive. Our primary focus is to simplify complex IT workflows for retailers that allow them to focus on retail and less on the technology that they have invested in.

### APPLICATION INTEGRATION

Building solutions that work how retailers want them to work and not how we want them to work is key to our approach.

### UNIFYING COMMERCE

Challenging times require change and that is what we are best at. Our focus is to change retail businesses from single channel to a truly omnichannel business.

### ONGOING SUPPORT

Our technical consultants are available 364 days of the year offering support to retailers from 8am to 8pm. We have standard, intermediate and premium packages available to suit every budget.

### CONTACT US NOW

## ABOUT US

We implement Cegid Retail, an advanced retail management solution alongside our Retail IT Hub. Our Retail IT Hub is a cloud based tool that allows different systems to operate together. This allows us to design specific workflows with these different systems that greatly increase efficiency and productivity, providing better sales, profitability and ultimately, great customer service.
